

For Us, It's Personal

Our daughters were in gymnastics for over ten years now, first as artistic gymnasts (thru Lvl 7), and then as acro gymnasts (thru Lvl 10). When they first began, we quickly realized the limitations of taking pix from the sidelines, even with a good camera. Sharp gymnastics photography requires a blindingly fast shutter speed (1/1000) in notoriously poor lighting, and you can't use a flash without endangering the airborne gymnasts. Accordingly, Paul earned himself USAG safety certification and began shooting out on the floor at local meets. He uses a professional Canon 1DXM2.

As families notice throughout competition season, most meet photographers offer unedited photos on a flash drive. We offer something different. We crop, sharpen, and color-correct every shot for maximum dramatic impact.

For gymnasts who **sign up before the session begins**, we will capture 25+ photos for gymnasts who sign up and pay **before the session begins**. Paul focuses on photographing floor and/or beam for each gymnast. Check out sample pix & collages at marchbanksphotography.com
